

Product overview

Thinking Space design and build consoles for control rooms

Using the CORE Aluminum system, all consoles are completely custom made for each application and have the capability for future alterations. This gives a true lifetime solution; as equipment changes the consoles can be changed to suit the client's needs.

Benefits to end user

- Completely custom designed around the end user's specific equipment and room layout
- Flexibility that provides on-site alterations and adjustments while still in use
- Full CAD designs provide the client with an accurate understanding of exactly what will be manufactured
- Ergonomic designs, which conform to control room design standards UL/ANSI/BIFMA/TBD

Key customers

- Procter & Gamble
- CNN
- Ministry of Defense
- JP Morgan
